## Projects

### National Geographic Traveller Website(Work Project)

Developed a website for National Geographic Channel using HTML, CSS and JavaScript for frontend. The backend was developed using SQL and PHP using a CMS called 'Processwire'. 'Redis' was used for cache.

Link: <http://www.natgeotraveller.in/>

### Client Server based Ticketing System(JAVA)

Developed a ticketing system using JAVA where a customer can register, to receive offers, view, modify, book and cancel reservation. An admin can add, remove movies and shows.

The client communicates with server using the JDBC interface.
